

Developing New Applications with Docker App Package

Workshop

Michael Irwin

Application Architect, Virginia Tech

Silvin Lubecki

Sr Software Engineer, Docker

Ulysses Souza

Software Engineer, Docker

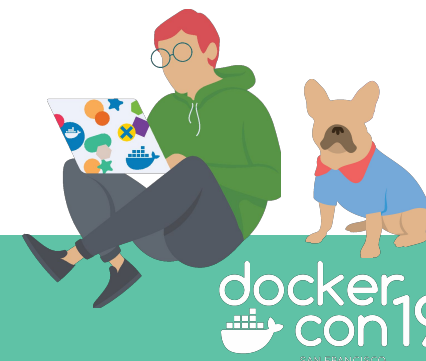

Wifi and Exercises

- Wifi
 - SSID: DockerCon19
- Workshop repository
 - <https://github.com/silvin-lubecki/docker-app-workshop-dc19>

Audience

- Who has heard about compose files?
 - Day to day use?
 - Can you write one on your own?
 - Do you use it in production?
 - Who uses docker-compose ?
 - Who uses docker stack deploy ?
- Who uses swarm ?
- Who uses kubernetes?

Link for Play with Docker: dockr.ly/newapps

Agenda

- Set up the workshop environment
- Exercise 1: Write and Deploy a Compose file
- Exercise 2: Creating the Docker Application
- Exercise 3: Running and Sharing our Docker Application

5 minutes Break

- Exercise 4: Configure your Application with Parameters
- Exercise 5: Disabling Services with x-enabled
- Exercise 6: Under the hood: CNAB
- Advanced/Optional Exercises
- Q&A

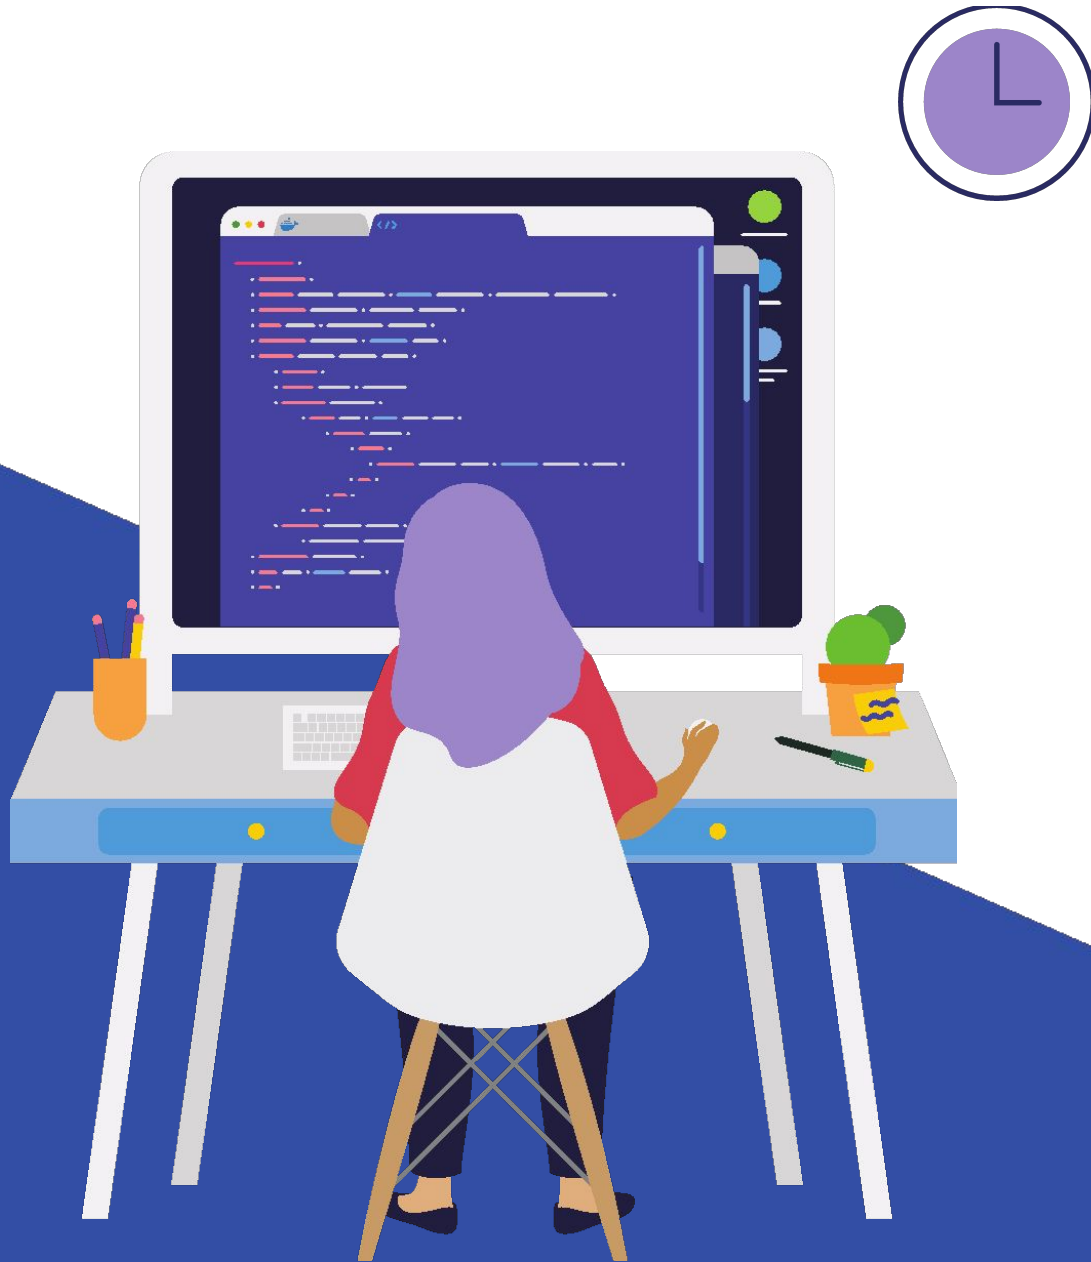

BREAK - 5mn

Questions ?

Compose and docker-app
are open source

Contributions welcome!
